Paclitaxel drug-releasing balloon system is intended for the treatment of coronary vessels. Curex is designed to improve the lumen diameter and to reduce restenosis in the treatment of lesion in native coronary arteries. It is also intended for pre and post dilatation during coronary stent implantation for improving luminal diameter.

#### Technical Specifications

Paclitaxel Drug is a proven anti-proliferative drug that blocks cellular proliferation and migration.

#### Tapered soft tip

- Ultra low profile for softer penetration
- High level of crossability
- Minimum vessel wall trauma

#### Enhanced Pushability & Trackability

- Hydrophilic coated shaft
- PTEF coated proximal shaft
- Highly flexible distal shaft
- The flexible balloon material allows for high crossability & trackability
